¹The Bank links the calculation of the fees specified in this list of terms and conditions to the average consumer price index published annually by the Central Statistical Office for the preceding calendar year. The amount or rate of the fee is automatically adjusted (indexed) as of April 1 of each year in accordance with the average consumer price index applicable to the preceding calendar year. The Bank publishes any changes to the fee in this list of terms and conditions by April 1 of each year at the latest. When adjusting the fee, the Bank applies a whole HUF amount based on general rounding rules; in the case of a fee specified in euros, the amount is rounded to two decimal places.

2.4. Apply for a Raiffeisen Credit Card Online

The use of the electronic stamp falls under the responsibility of two individuals authorized to make commitments on behalf of the Bank: Gábor Rajna and Péter Zeisler.

2.5. General Information on the APR

The APR was determined based on current terms and conditions and applicable laws and may change if these terms and conditions change.

In determining the APR, the Bank based its calculations on the following terms and conditions:

Credit limit amount:

- Visa Classic Credit Card: 375,000 HUF,
- Visa Platinum Credit Card: 750,000 HUF

In the case of the Visa Platinum Credit Card, the APR calculated was by taking into account the lowest credit limit available at the Bank, contrary to the conditions set forth in Section 9(1)(c) of Government Decree No. 83/2010 (March 25).

Additional factors considered when calculating the APR:

- Term: 1 year.
- Purchase interest
- Fees and costs:
the card’s annual and monthly closing fees

In determining the APR, the Bank applied the following calculation method. The entire available credit limit is utilized through purchases on the first day of the first billing cycle, and the Cardholder pays only the Minimum Payment due at the end of the grace periods following each billing cycle (payment due date), or repays the entire remaining balance in a single lump sum upon the expiration of the one-year assumed term.

The total credit cost indicator applicable to the final credit limit approved by the Bank—which may differ from the value indicated in this List of Terms and Conditions—is set forth in the Bank’s written notice, which forms part of the individual contract. The settlement period

taken into account in the calculation of the APR runs from the 25th day of each month to the 25th day of the following month. If the cut-off date is not a banking business day, the banking business day immediately preceding it shall be taken into account in the calculation of the settlement period. The APR value does not reflect the interest rate risk of the loan.

The APR is calculated using the following formula:

$$H = \sum_{k=1}^m \frac{A_k}{(1+i)^{t_k}}$$

Where: H: the loan amount, reduced by the costs associated with taking out the loan

A_k: the amount of the kth installment,
 m: the number of installments,
 t_k: the date of the kth installment, expressed in years or fractions of a year,
 i: the APR
