Date and time of production	01 July 2026

What is this product?

Type

Public, open-end alternative investment fund

Objectives

The aim of the Fund is to ensure a competitive yield with the yield of short-term Hungarian government securities and fixed interest rate of HUF bank deposits. The majority of the Fund's assets are invested in short-term government securities issued by EEA member states and in corporate bonds, and to a lesser extent in term and sight bank deposits. The Fund invests at least 80% of its assets in assets issued outside Hungary. Currency risk of these assets are hedged by the Fund Manager with derivative instruments. The Fund reinvests all interest income to increase the value of its units. The Fund does not distribute its income. The management of the Fund is active, without a reference index.

The Fund's investment units can be purchased and redeemed on every distribution day. Every bank business day ('banking day') is a distribution day, with the exception of those banking days on which the distributor declares a distribution holiday in accordance with legal regulations or the distribution is suspended due to extraordinary circumstances.

Intended retail investor

The Fund's investment certificates are marketed in Hungary to resident and - with the exception of US persons - to non-resident natural and legal persons, as well as to business companies without legal personality. The product is intended to be offered to retail investors who fulfil all of the criteria below

- they have average financial knowledge, a lower than average risk tolerance and an investment time horizon of at least half a year, and have the ability to understand the product and its possible risks and rewards, either independently or through professional advice;
- in order to achieve performance above the risk-free return, they are willing to accept additional limited risk that is consistent with the summary risk indicator shown below;
- they accept the risk that the Fund Manager or the custodian could fail to pay or perform its obligations under the product, and they are able to bear a total loss of their investment.

The product is not intended to be offered to retail clients who do not fulfil these criteria.

Custodian Bank

The custodian bank of the Fund is Raiffeisen Bank Zrt.

Expiration

The Fund has an indefinite term and has no expiry date.

The initiation of termination proceedings against the Fund may be decided by the Fund Manager or the Supervisory Authority. It is mandatory to initiate the procedure, a) if the Fund's net asset value does not reach HUF 20 million on average over a period of 3 months; b) if the Fund's net asset value has become negative; c) if the Fund Manager's activity license has been revoked by the Supervisory Authority, d) if the Supervisory Authority has obliged the Fund Manager to hand over the management of the Fund, however, no investment fund manager takes over the management of the Fund, e) if the conditions for continuous distribution are still not ensured after the termination of the suspension of the continuous distribution of the investment units or the redemption of the investment units. In the above cases, the Investment Fund Manager is entitled to unilaterally terminate the Fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 6 months. The actual risk can vary significantly if you redeem at an early stage and you may get back less than the amount invested.

The summary risk indicator can help you assess the risk related to this product in comparison with other products. It shows how high the probability is that you lose money with this product if the markets develop in a certain way or we are not able to pay you out.
We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you. Tax laws that affect you may affect the actual payout.
Risk elements that are not fully expressed by the aggregated risk indicator, but are of decisive importance from the Fund's point of view: liquidity, operational and counterparty risk. Chapter 26 of the Fund's Prospectus provides further detailed information on these risk factors. This product does not include protection against future market performance, so you may lose all or part of your investment. If the custodian of the Fund is unable to make the payment due to you, you may lose your entire investment. However, you can use a consumer protection scheme (see the section „What happens if the Fund Manager is unable to pay out"). The above indicator does not take this protection into account.
For detailed information about all risks relating to the Fund please refer to the risk sections of the Prospectus and any supplements thereto as specified in the section "Other relevant information" below.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances. Markets could develop very differently in the future.

Recommended holding period:		***6 months***
Example investment:		***HUF 4 000 000***
Scenarios		***If you exit after 6 months***
Minimum	**There is no minimum guaranteed amount. You could lose some or all of your investment.**	
Stress	**What you might get back after costs**	HUF 3 381 550
	Average return each year	-28,53%
Unfavourable[1]	**What you might get back after costs**	HUF 3 714 340
	Average return each year	-13,77%
Moderate[2]	**What you might get back after costs**	HUF 3 787 150
	Average return each year	-10,36%
Favourable[3]	**What you might get back after costs**	HUF 4 059 820
	Average return each year	3,01%

[1] This type of scenario occurred for an investment between 2021-09-30 and 2022-03-31.

[2] This type of scenario occurred for an investment between 2019-01-31 and 2019-07-31.

[3] This type of scenario occurred for an investment between 2022-12-31 and 2023-06-30.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Fund Manager is unable to pay out?

The custodian of the fund's assets is Raiffeisen Bank Zrt., which keeps the fund's assets separate from its own and the Fund Manager's assets. If the Fund Manager were to go bankrupt, the Fund's assets would not be affected, the custodian would liquidate the Fund's assets and pay them to the investors. The custodian is liable to the fund and its investors for any losses caused by negligent or intentional failure to perform its safekeeping or recordkeeping obligation. The custodian is a member of BEVA. This institution of compensation is intended to mitigate the damages that investors may suffer as a result of the BEVA member with whom they deposited securities or money not being able to fulfill their legitimate claim. The Fund is not subject to any legal or other deposit guarantee.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0% annual return).
- HUF 4 000 000 is invested.

	If you exit after 6 months
Total cost	HUF 275 502
Cost impact*	7.12%

* This illustrates how costs reduce your return over a holding period of less than one year. This percentage is not directly comparable to the cost impact figures provided for other PRIIPs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. These figures include the maximum distribution fee that the person selling you the product may charge (3% of amount invested / HUF 120 000). This person will inform you of the actual distribution fee.

Composition of costs		
One-off costs upon entry or exit		**If you exit after 6 months**
Entry cost	3% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to HUF 120 000
Exit cost	3% of your investment before it is paid out to you. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to HUF 120 000
Ongoing costs taken each half year		
Management fees and other administrative or operating costs	1,32% of the value of your investment per year. This is an estimate based on actual costs over the last year.	HUF 26 400
Transaction costs	0,46% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	HUF 9 102
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	

How long should I hold it, and can I take money out early?

Recommended holding period: 6 months

The product is a short-term bond fund, its risk classification is low, and the recommended holding period corresponds to this.
The Fund is a public, open-ended fund, therefore the distributor is obliged to accept redemption orders for the investment unit and to provide a distribution settlement day on every banking day (distribution day), except in cases of suspension and interruption of the distribution of investment units, and the interruption of the distributor's customer service. When redeeming investment units, the distributor may charge a 2% penalty commission in addition to the above fees. A penalty fee is charged if:
a) less than 5 banking days have passed between the purchase and redemption of the investment units, or their conversion to the investment units of another investment fund managed by the Fund Manager;
b) the value of the units to be redeemed by the investor exceeds HUF 400.000.000, i.e. four hundred million forints, and the investor has not notified the Fund Manager of his request in writing at least 5 banking days prior to the redemption (indicating the amount, the distributor and the date).
Because of the above, your actual cost may increase significantly if you hold your investment for less than 5 banking days, or if you fail to comply with the above reporting requirements, and you may receive a smaller amount back.

How can I complain?

Verbal complaint
(a) in person: at the location of the central administration of the Fund Manager (1133 Budapest, Váci Street 116-118), every working day, during the working hours and opening hours of the Fund Manager (between 9:00 a.m. and 5:00 p.m.);
(b) by telephone: via the Raiffeisen Direct telephone customer service at +36 80 488 588 (0-24 hours, every day of the week).
Written complaint
(a) by fax: at the fax number 484-4444, addressed to Raiffeisen Bank, Central Complaints Management Group;
(b) by post: addressed to the Raiffeisen Bank, Central Complaints Management Group (Budapest, 1700)
(c) in person or by someone else - by means of a document delivered to the central administration of the Fund Manager (1133 Budapest, Váci Street 116-118.), on working days between 9.00 a.m. and 5:00 p.m.;
(d) by electronic mail: sent to info@raiffeisen.hu.
